Price Quantity Total

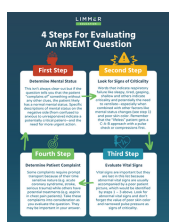

Spinal Motion Restriction | 18in x 24in

\$ 20

\$

A step-by-step approach to spinal motion restriction, based on the latest research from the American College of Surgeons (ACS), the American College of Emergency Physicians (ACEP) and the National Association of EMS Physicians (NAEMSP). Includes 2 posters: Assessment & Application.

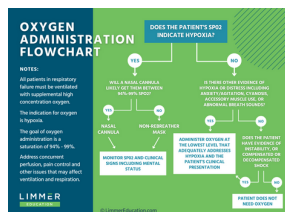

4 Steps for Evaluating an NREMT Question | 18in x 24in

\$ 10

\$

Scenario-based National Registry questions are often filled with clues. Use this 4-step process to find the key details that determine what the best answer is.

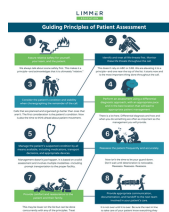

Oxygen Administration Flowchart | 24in x 18in

\$ 10

\$

EMS providers and students often struggle with how much oxygen to give to patients. This flowchart makes it easier to answer that question. It also reminds emergency care providers that not all respiratory patients need oxygen.

Guiding Principles of Patient Assessment | 18in x 24in

\$ 10

\$

These guiding principles teach students how to think about patient assessment rather than just memorizing a skill sheet. Put this poster on the wall of your classroom or lab and when a student struggles, pick out one of the principles and help the student along with it.
